## REMARKS

The figures of births and deaths shown in this statement for week ending the 12th October, 1957 relate to 179 towns with an estimated population of 22,255 thousands. Information about Andhra Pradesh, Assam, Delhi, Madhya Pradesh, Pondicherry, Rajasthan and West Bengal could not be included. The total number of towns is 319 and their population is 42,930 thousands. Thus 56% of the total number of towns representing 52% of the total population is covered in this statement.

The number of births and deaths recorded in these towns were 17,088 and 6,656 representing birth and death rates of 40.0 and 15.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population. The following table gives the position by States:—
